## **VCC's New FlexVolt™ Technology Allows Indicators to be Used With Voltages Ranging from 5V to 28V**

POWAY, CA (November 24, 2014) — VCC, the global leader in indication and specialty illumination solutions, has developed a series of indicators that combine design flexibility and ease of assembly with ruggedness and reliability. The all-in-one CNX 714FV Series 14mm indicator utilizes FlexVolt™ Technology, enabling it to be used with voltages from 5V to 28V. The CNX 714FV Series has fast pitch threads that require only one turn for easy assembly.

Designed for harsh environments, the CNX 714FV is resistant to shock and vibration, and is IP67 / NEMA 6P rated for outdoor applications. The CNX 714FV Series provides direct sunlight visibility and a wide viewing angle for maximum light detection.

The RoHS & Reach-compliant indicator has a mounting hole size of 14mm (0.551") and has 24 AWG wire leads.

Custom LEDs and lens colors are available upon request.
