## **VCC Offers Watertight LED Panel Mount Indicator**

**POWAY, CA (February 25, 2015)** — VCC, the global leader in indication and specialty illumination solutions, has designed an LED panel mount indicator with a robust metal body that provides drip-proof protection. The 0.230” (5.9mm) watertight L60 Series LED panel mount indicator utilizes a tinted diffused LED with a 45 degree viewing angle.

With an attractive, reflective chrome plated body, the watertight L60 Series is ideal for automotive, aerospace, industrial, instrumentation, medical, military, mining, outdoor, safety, transportation and vending & gaming machine applications.

Available in design voltages of 5VDC, 12VDC, and 28VDC, the L60 Series LED panel mount indicator has 6-inch (152.4mm) 24 AWG wire leads and is designed to mount in a 0.230” (5.9mm) mounting hole with a maximum panel thickness of 0.070” (1.7mm). Mounting hardware comes standard.

The RoHS compliant LED panel mount indicator is offered in red, amber and green colors.
