

# PCL22 Demo Board

## For Trade Shows and Special Events

PCL22 series 0.88" (22mm) LED Pilot Light  
Advanced Light Diffusion Technology

On the front is a switch button that allows to showcase the bi-color red/green PMI

The Demo Board is powered with a A23 Battery and the on/off is on the back of the board

Contact your VCC representative for more details

We hope the demo board will bring more knowledge to VCC's product offering

Please Make sure to buy extra batteries so the board won't go 'dark' during your event

Are you ready for next level illuminated components?
